

Fishery Ecosystem Plan Outreach Ideas

O&E Technical Committee Meeting
December 6, 2022

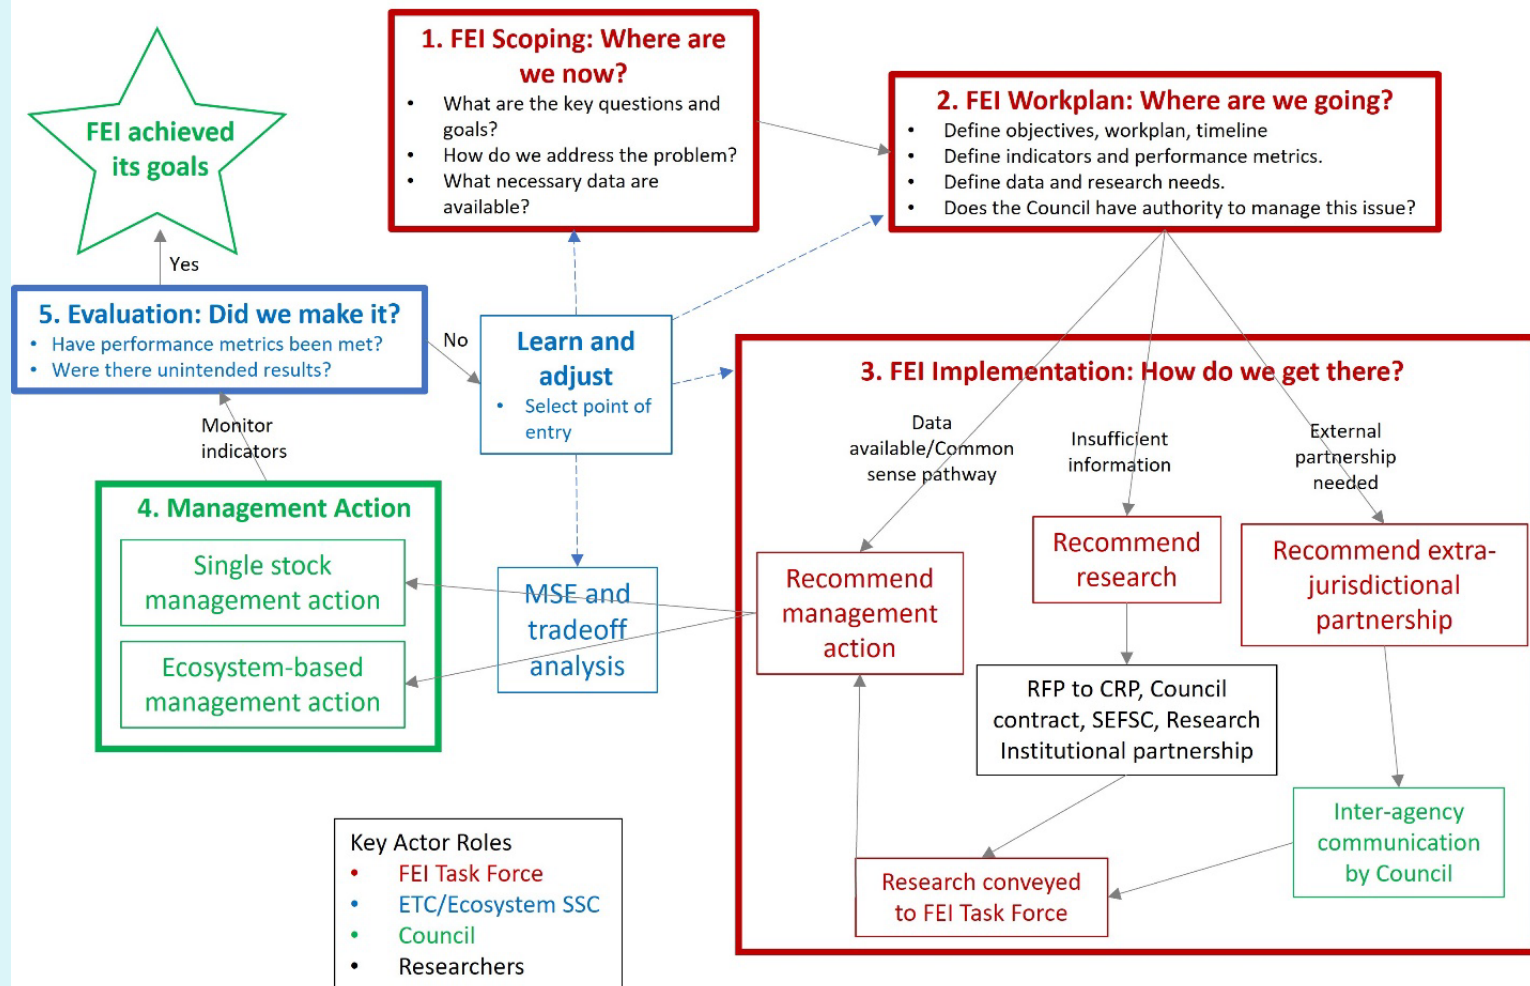

Background

- The Council has begun working on a Fishery Ecosystem Plan (FEP)
 - Ecosystem Technical Committee
 - Contract with LGL
- Fishery Ecosystem Issue (FEI):
Operationalizable documents or modules that address specific management issues using the steps laid out in the FEP

FEI Loop – Proposed by LGL

Fishery Ecosystem Issue (FEI) Loop

Direction from the Council

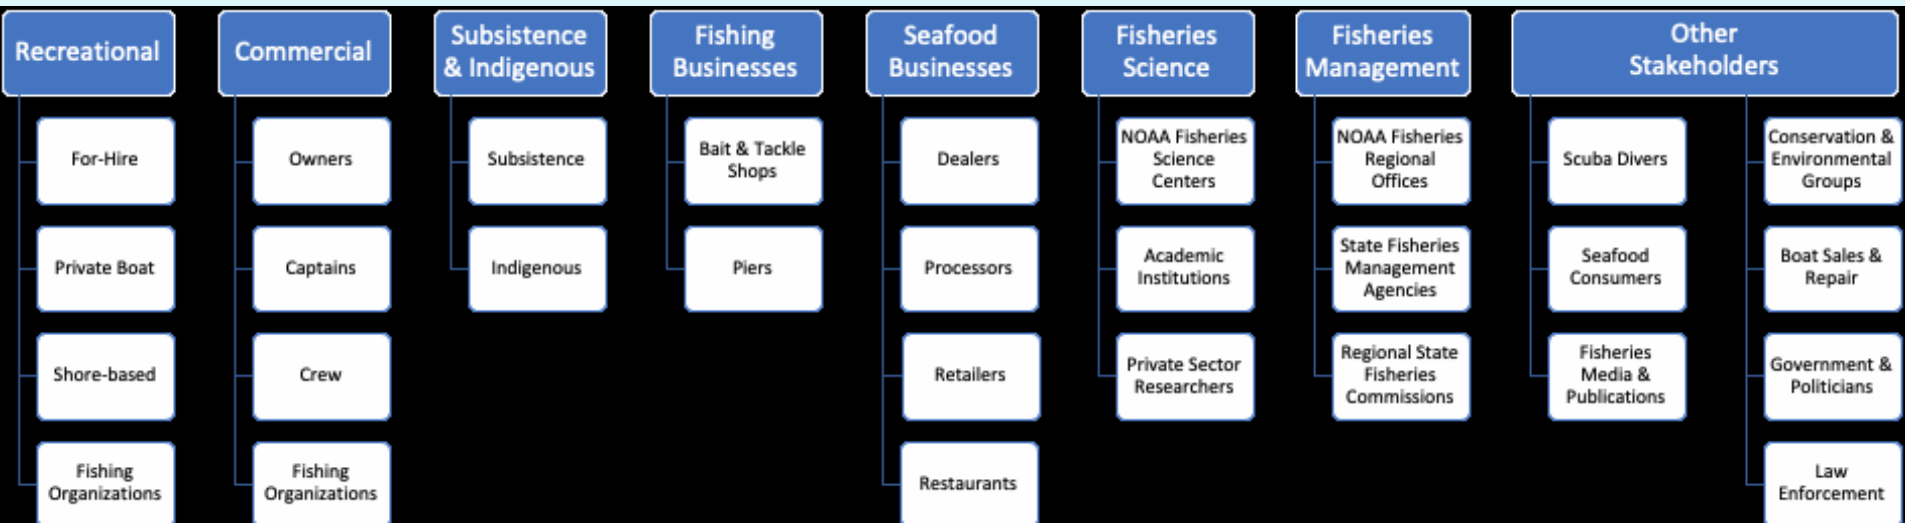

Motion: That the ETC be charged with the following tasks:

1. Revise the ETC mission to ensure long term advice to the Council for the FEP.
2. Develop goals and measurable objectives for the FEP and up to 4 FEIs.
3. Create criteria for prioritizing FEIs. Utilize the criteria to recommend the top 4 FEIs.
4. The ETC is to develop a plan to engage stakeholders in the process.

Feedback from the O&E

- Identifying stakeholders
 - How to select stakeholders?
 - How to reach underrepresented or difficult to engage groups?
 - How to prioritize stakeholder input?

Feedback from the O&E

- When to engage stakeholders?
 - At the early stage of identifying the FEIs?
 - At later stages to collect feedback on the outcomes of management scenarios?
- Council tools: Fishermen Feedback and Advisory Panels
 - How can these be used to inform the FEIs?
 - Any other ideas?
