

Developing a Fishery Ecosystem Plan for the Gulf of Mexico

Data Collection AP Meeting
February 13, 2023

Development of a Gulf of Mexico Fishery Ecosystem Plan (FEP)

Overseen by Ecosystem Technical Committee

- Contract with LGL Ecological Research Associates
- Fishery Ecosystem Issue (FEI): Operationalizable documents or modules that address specific management issues using the steps laid out in the FEP

Work Plan

- Convene Ecosystem Technical Committee to work on identification, selection, and prioritization of FEIs.
 - How to operationalize the FEP?
- Engage the O&E Technical Committee throughout the process to increase stakeholder engagement.
