Gulf Shrimp Ex-vessel Prices:

- Average price recovered +15% in 2024; from 2023's all time low
- But 2024 landings down by about another fifth
- Tentatively, 2025 prices up another +38% from 2024; up +59% from 2023's low
- And 2025 prelim reported landings already exceed 2024 (but still very low, historically)
- Large and increasing premium for larger shrimp sizes (smaller counts) even though price level is still very low
- When accounting for size, Brown Shrimp seems to get a slight premium over White Shrimp in 2024; and, tentatively, in 2025
